DD Adjustable Pedestal supports are designed for use with pavers and decking on flat roofs, balconies and terraces. DD Pedestals are the solution if you want a beautiful paved terrace that is free draining, compatible with waterproofing membranes, easy to install and low cost. More roof and balcony designs incorporate a completely flat upper surface in order to utilize them more effectively as leisure areas. Useful, practical areas can be created for leisure or services and maintenance, which would previously have been left as exposed waterproofing membrane. Not only does this help protect potentially vulnerable areas, but it increases the yield of the building footprint.

- new **more durable screw ring**
- **strengthening** base ribs
- **holes** in base for rawplugs
- **water outlet holes** in base
- base **diameter increased**
